

AKASH NANDAWANA

Business Intelligence Manager | Data Strategy | Commercial Transformation

Somerset, UK • [+447469289001](tel:+447469289001) • akashnandwana22@gmail.com • LinkedIn: linkedin.com/in/akash-nandawana

PROFESSIONAL PROFILE

Business Intelligence Manager who progressed from Analyst to Manager in under four years, leading a team of four and owning data strategy across Commercial, Finance, Supply Chain and Operations. Experienced in **shaping BI roadmaps, modernising data platforms, pricing and costing frameworks, £165m+ budgeting and forecasting processes, and data governance initiatives**. Delivered £1.7m in savings, protected £400k in profit and directed a Qlik Sense-to-Power BI transformation across 15+ business areas. Experienced across **Microsoft Fabric, modern data engineering, data modelling, Power BI and automation**, combining technical delivery with commercial leadership and stakeholder management.

KEY ACHIEVEMENTS

- **£1.7m savings** – Created the **RAG classification framework** by analysing BOM component usage across SKUs to flag waste and duplication, driving the £1.7m rationalisation savings programme across 1,992 products.
- **£400k profit protected** – Identified commodity cost increases early, enabling timely pricing action.
- **21% faster decision-making** – Directed the Qlik Sense-to-Power BI transformation across 15+ business areas.
- **14% overhead reduction** – Analysed and removed avoidable spend across employment, utilities and other overhead costs.
- **40% lower recurring workload** – Cut recurring workload through automation, delegation and developing analysts into subject-matter owners.
- **20% higher retention / 7% revenue growth** – Applied customer segmentation and commercial analysis to identify growth and retention opportunities.

CORE EXPERTISE

Data Strategy & Roadmaps | Data Governance & Quality | BI Transformation | Commercial Analytics | Budgeting & Forecasting | P&L Support | Margin & Pricing | Costing | SOA | CAPEX & Overhead Analysis | KPI Frameworks | Decision Frameworks | Stakeholder Management | Team Leadership | Process Improvement

TECHNICAL SKILLS

Microsoft Data Platform: Microsoft Fabric (OneLake, Lakehouse, Dataflow Gen2, Data Pipelines, Warehouse, Semantic Models), Power BI (DAX, Power Query)

Data Engineering & Modelling: SQL, ETL/ELT, Dimensional Modelling, Data Quality, Data Lineage.

Analytics & Visualisation: Power BI, Qlik Sense, Advanced Excel, KPI & Management Reporting.

Programming, Automation & Integration: Python (Pandas, NumPy), Power Automate, Excel/VBA, AI-Assisted Automation, LLM Workflows, Oracle EBS, Oracle Fusion, Microsoft CRM, Amazon FBA Integration.

PROFESSIONAL EXPERIENCE

NUMATIC INTERNATIONAL

Business Intelligence Manager

Business Intelligence Team Lead

Business Data Analyst

Somerset, UK

Jan 2026 – Present

Aug 2024 – Dec 2025

Aug 2022 – Aug 2024

Strategy, Commercial & Financial Planning

- **Created and now lead the £165m+ Commercial & Retail budgeting and forecasting roadmap**, defining inputs and stages across sales, NPD, pricing, commodity, shipping and labour.
- **Developed the margin and pricing framework and built self-service models** across 5,000+ SKUs, enabling Account Managers to price against margin and bonus targets.
- **Built and own the Power BI standard costing model**, with automated alerts for BOM, labour, overhead and cost changes.
- **Oversee £17m Retail Sales Out Allowance (SOA)**, covering forecasting, promotions and credit reconciliation; redesigned the process to resolve cross-period discrepancies.
- **Support Directors with P&L, CAPEX and overhead analysis**, contributing to a 14% reduction in overheads.

Data Governance & Transformation

- **Defined key elements of the data governance framework**, including role-based data visibility aligned to UK GDPR, a Sales KPI framework and a platform/model health log by department.
- **Own and drive the BI and data roadmap**, prioritising reporting, automation, data quality and decision-support capabilities against business priorities.
- **Strengthened data quality, reconciliation** and lineage from source through ETL/ELT and semantic models to Power BI, improving traceability and consistency of reported information.
- **Directed the Qlik Sense to Power BI migration across 15+ business areas**, creating the roadmap and UAT framework covering testing, issue tracking, ownership and sign-off.
- **Developed and rolled out a business glossary and data-literacy programme** across Commercial, Finance, Supply Chain and Operations to align data definitions.
- **Engineered automated ETL/ELT solutions** across Oracle, CRM and Amazon FBA, reducing manual reporting activity.

Leadership

- **Lead a team of four analysts across major project roadmaps**, setting priorities, defining ownership, allocating work, providing training and automating SMT updates at key milestones.
- **Develop analysts into subject-matter owners**, enabling independent improvements and reducing recurring workload by 40%.
- **Partner directly with** Commercial, Retail, Sales, Supply Chain and Operations Directors and SMT to turn business problems into actionable recommendations.

INNOVATION & INDEPENDENT R&D

Clean360 — Intelligent Cleaning Platform

Product Strategy | Innovation | Data | IoT

- Identified a manual service-booking process managed by a 7-person team and created the roadmap for a connected NFC/IoT platform designed to enable direct service booking and machine diagnosis.
- Developed a **customer-facing savings model** covering water, electricity, labour and operating costs, helping Sales quantify the financial value of Numatic solutions.
